

FACILITIES DEVELOPMENT MANAGER 1625
SENIOR FACILITIES DEVELOPMENT MANAGER 1639

DEFINITION

Plans and coordinates the execution of pre-construction activities associated with the preparation for the building of new schools and modernization projects. A Senior Facilities Development Manager supervises a team of Facilities Development Managers and other assigned staff to oversee the design, management, and pre-construction activities of school facilities.

TYPICAL DUTIES

Assists the Facilities Asset Development Director in the development of project scope and coordination of architectural planning, design, funding, and development of school facilities. Provides functional direction over pre-construction project schedules, cost control, dispute resolution, and quality control.

Reviews pre-construction project status to monitor schedule and budget variances relative to submitted schedules.

Assists in coordinating the pre-construction program activities and related work products of those in other District branches and departments such as the Office of Environmental Health and Safety, Real Estate, Community Outreach, School Management Services/ MPD and Maintenance and Operations, Project Execution, Facilities Contracts, and Procurement.

Resolves pre-construction project issues by resolving differences of opinion, conflicts in schedules, and disagreements over the most efficient approach to the plan and design of new schools.

Reviews, recommends, and implements program and project level policy and procedural innovations.

Coordinates with representatives from various utility and government agencies to obtain timely action on successive phases of project completion.

Assesses bid specifications for District need and probability of completion within the specified timeline.

Prepares and writes presentations and board report material and makes presentations to Board Members, District administrators, and representatives of public agencies.

Reviews and verifies submitted applications for payment and performs overall fiscal management of multiple design and construction projects.

Performs related duties as assigned.

DISTINGUISHING CHARACTERISTICS AMONG RELATED CLASSES

A Facilities Development Manager provides functional direction over those integral to the preparation of sites for construction activities, including environmental evaluations, design, site due diligence, interim utilization issues, and stakeholder outreach.

A Senior Facilities Development Manager supervises a team of Facilities Development Manager and Design Managers in the preparation and implementation of predevelopment projects;

supports senior administrators and executives on preconstruction project priorities and policies and procedures; and works on complex large scale projects.

The Facilities Asset Development Director provides overall administrative and functional management for pre-construction project development to an assigned geographical region.

SUPERVISION

General supervision is received from the Facilities Asset Development Director, or other higher level administrator. General supervision is exercised over technical employees assigned to preconstruction activities.
