

LOGISTICS SUPERVISOR 5135
ASSISTANT LOGISTICS SUPERVISOR 5140

DEFINITION

Plans, organizes, and supervises the daily logistical operations of a school district procurement warehouse including receipt, inspection, storage, distribution, loading, and delivery of supplies including route planning. An Assistant Logistics Supervisor assists a Logistics Supervisor with the aforementioned functions.

TYPICAL DUTIES

Plans delivery routes using a computerized routing system, monitors routes daily, and makes necessary adjustments to routes to correct for overloads, lateness, and related problems. Confers with warehouse management to determine overall quantities of product to be shipped. Supervises the loading of trucks to ensure the proper sequence of deliveries, space utilization, load balance, and prevention of damage to product. Routes and dispatches trucks for deliveries and transfers of supplies, freight, foods, material, equipment, and mail. Verifies the accuracy of quantity, condition, labeling, and address information to ensure such information is consistent with information on shipping invoice and resolves shipment discrepancies. Checks daily truck reports for proper accounting charges. Orients and trains personnel assigned to loading docks. Schedules and arranges safety inspections of trucks. Provides cost analysis and truck routing recommendations and related reports such as cost estimates and requests for moving furniture and equipment at District locations based on labor, materials, and equipment requirements to the Truck Operations Manager based on cost information entered into the computerized routing program. Makes presentations related to the logistic routing program to staff as required. Serves as liaison for Truck Operations with technology vendors related to warehouse management systems and routing and bar-code labeling programs. May drive any truck or tractor-trailer combination as permitted with a Class A Commercial Driver License for short distances on public streets and may hook and unhook trailers. Performs related duties as assigned.

DISTINGUISHING CHARACTERISTICS AMONG RELATED CLASSES

A Logistics Supervisor utilizes a computerized routing system to plan, coordinate, and supervise the loading and routing of supplies and makes recommendations towards improving work flow.

An Assistant Logistics Supervisor assists a Logistics Supervisor with the planning, coordination, and supervision of the logistical operations of a procurement warehouse.

A Head Stock Clerk has responsibility for one or more supply operations and supervises Stock Clerks, Stock Workers, Forklift Operators, and clerical personnel in the ordering, receiving, storing, and issuing of supplies and equipment. A Head Stock Clerk supervises a large crew in the performance of duties related to one supply function or supervises fewer employees in the performance of duties involved with a variety of supply functions.
